Admins web task:

Part 1: For admin:

❶ Login Page:

- Login with phone (Country code name, country code, phone number) and password, remember me.
- Password: must be contain Capital Character, small Character, Special Character, Numbers, and length of password at least eight characters.
- You must prevent user to enter characters in phone and you choose country code with country code name from combo box.

❷ News dashboard page:

- Admin can add new news with title, details, image of news, and language of news (AR / EN).
- Admin can set active time to 10 news; there will appear in first page.
- If he clicked in any news, you can show all details.
- He can Delete and update any news.
- In side of news Page you must put Dashboard which admin can follow:
- Count of users see news and news Details.
- Most five news that users show in general.
- Admins can add news in Arabic or English language.

Part 2: For users:

- ➢ Show all news and details without login or dashboard, as like (YallaKora).
- ➢ News will appear in a grid view like as YallaKora website, at least 10 news in first page, and you can click next to show others news (pagination).
- ➢ User can change language of site to show in Arabic or English
- ➢ If site is English, only English news is appeared, and if site is Arabic, only Arabic news is appeared.
- ➢ You can put news appear as default if admin do not upload any news.
- ➢ User can search in news, via live search; he can search by used title of news or some content of details.
